EXAMINER

PANTUCK, BRADFORD C

ART UNIT PAPER NUMBER

3731

DATE MAILED: 02/25/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

Application No.

10/077,618

Applicant(s)

FEIGL, ALEXANDER J.

Examiner

Bradford C Pantuck

Art Unit

3731

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 02 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-63 is/are pending in the application.
- 4a) Of the above claim(s) 20-30 and 42-63 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-19 and 31-41 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on February 15, 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Election/Restrictions*

1. Claims 53-63 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, and claims are 20-30 and 42-52 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-19 and 31-41 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,190,396 to Whitin et al. Regarding Claim 1, and with reference to Figure 9, Whitin discloses a device including a body (20). Body (20) has a lumen (80) extending from a first lumen opening on the lateral side of the tube to a second lumen opening on the proximal end of the body. The lumen is adapted to receive a needle (70) and a suture [Column 9, lines 30-34]. The suture (inside and outside of the lumen) is visible in Figure 9.

Whitin's body (20) also has a first needle guide channel (80), which extends from a first needle guide channel opening on the lateral side of the tube to a second needle guide channel opening on the proximal end of the body. Examiner emphasized that Whitin discloses multiple lumens/channels, each having a separate proximal opening as is apparent from the cross sectional view of Figure 9.

Whitin's configuration is just as capable of performing the intended use as Applicant's invention. Whitin does not disclose such an intended use, but the user could arrange the needle and suture in the configuration mentioned by Applicant and pull the suture, as intended by the Applicant.

3. Regarding Claims 2, 8, 9, 12, 32, 38, and 39, each of Whitin's needle guide channels is shaped like an arc [apparent from Figure 9].
4. Regarding Claims 3-5, 13-15, and 33-35, Whitin's device (10) has a handle coupled to body (20). The handle is especially well shown in Figures 1 and 2, and takes the form of a handle with a trigger, as in a gun. This handle is coupled to the body (20) through the various mechanisms of the device, as obvious in Figure 1. These mechanisms can be referred to as connector pieces. For example, one of the connector pieces are push rods (156), which must be bendable, because they "traverse the curved channel 80" [Column 9, lines 35-41].
5. Regarding Claims 6, 16, and 36, Whitin's body is tapered, towards the distal end, as shown in Figure 9.
6. Regarding Claims 7, 17, and 37, Whitin discloses multiple (eight, specifically) additional needle guide channels, each extending from its own first needle guide

channel opening formed in the body (20) to its own second needle guide channel opening formed in the body. In Figure 9, although only one needle guide channel and one lumen are shown, this is because this view is a cross sectional view. Whitin discloses that either the pusher with push rods (156) as shown in Figure 12 or the pusher of Figure 11 may be used to push the needles/sutures through the needle guide channels of Figure 9 [Column 9, lines 32-41]. *This implies that there are as many channels to receive the needles/pushers as there are needles/pushers.*

7. Regarding Claims 10, 11, 18, 19, 40, and 41, because the pushers appear to be equidistant and arranged circumferentially [see Fig. 12], the needle guide channels (80) necessarily will also be equidistant and arranged circumferentially.
8. Regarding Claim 31, Whitin's body (20) has a first needle guide channel (80), which extends from a *first needle guide channel opening* on the lateral side of the tube to a second needle guide channel opening on the proximal end of the body. Thus, Whitin has anticipated a claim to a body with only one needle guide channel.
9. Further regarding Claims 31 and 37, Whitlin's apparatus is *capable of performing such an intended use*. As shown in Attachment #1, were one to back load the needle into the position as shown and pull on the suture forward (direction #1), then the needle will advance out of the body backwards (direction #2). Although Whitlin does not specifically disclose this use of his device, his device is capable of such a use. His device is certainly "*configured*" in such a way to allow this use of his invention.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,613,974 to Andreas et al.

U.S. Patent No. 6,517,553 B2 to Klein et al.

U.S. Patent No. 6,241,749 B1 to Rayhanabad

U.S. Patent No. 6,468,293 B2 to Bonutti et al.

U.S. Patent No. 6,183,474 B1 to Bramlet et al.

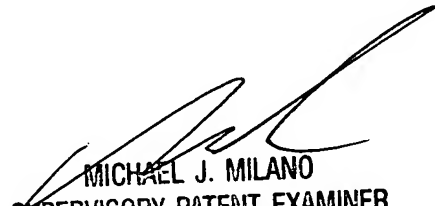

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradford C Pantuck whose telephone number is (703) 305-8621. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J Milano can be reached on (703) 308-2496. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
